

Bion Environmental Technologies to Present at the Drexel Hamilton Micro-Cap Investor Forum Conference

November 11, 2014. New York, New York. Bion Environmental Technologies, Inc. (OTC QB: BNET), a provider of proven innovative livestock waste treatment technology, announced today that CEO Dominic Bassani will be a presenter at the Drexel Hamilton Micro-Cap Investor Forum on Thursday, November 13th, 2014.

Bion's proven technology platform provides cost-effective and comprehensive environmental treatment of livestock waste and recovers renewable energy, clean water and valuable nutrients (nitrogen and phosphorus). Federal and state strategies are being developed to address excess nutrients that the EPA calls the "the greatest water quality problem in the U.S." Livestock waste is one of the largest sources of unregulated nutrients in most watersheds and the industry is also under scrutiny for greenhouse gas emissions and other impacts.
